

PRESS RELEASE

NORMAN POLICE DEPARTMENT

Members of the Norman Police Department's Criminal Investigation Division will provide a live demonstration of the speed and ease of committing auto burglary to members of the media on Wednesday, September 28, 2011, at 1:00 PM. The detectives will hold the event at the Police Training Facility, which is located at 3942 Jenkins Avenue, south of Hwy 9. Working in cooperation with Quality Towing, who has arranged to provide the vehicle, detectives will perform timed displays of auto burglaries using techniques preferred by criminals—including examples of the speed with which an auto burglar can break a car's window and remove valuable property.

Additionally, officers will offer crime prevention tips, materials, and department initiatives, such as our "Vehicle & Residential Burglary Report Card," aimed at increasing residents' awareness of the potential risks of becoming a victim by leaving personal property in their cars.

The department also extends an open invitation to any members of the public that would like to attend the demonstrations.
